

More than US\$ 3,825 Saved Annually with Mobil Gargoyle Arctic 226

**Sabroe Refrigeration Compressors (screw type & reciprocating type)
Nestle Food Co.
Korea
Mobil customer since 1987**

Objective

To extend the drain interval and reduce maintenance cost

3 Sabroe screw compressor type and 5 Reciprocating compressor type uses Ammonia as a refrigerant and the evaporator temperature is at -42°C . The recommended lubricant could not provide long drain interval.

Solution

Mobil Engineers recommended synthetic refrigeration compressor lubricant Mobil Gargoyle Arctic SHC 226 to replace the initial fill.

Result

Mobil Gargoyle Arctic SHC 226 helped extend the drain interval by 4 times and significantly reduced waste oil and maintenance cost.

Benefits

Over US\$ 3,825 in savings are achieved annually.
